## PROFILE

---

Results-driven Back-End Developer with 5+ years of experience building scalable, efficient web applications using PHP, Symfony, and modern development tools. Proven ability to collaborate in Agile environments, deliver high-impact solutions, and mentor team members. Passionate about clean code, automation, and system optimization.

## PROFESSIONAL EXPERIENCE

---

**Full Stack PHP Developer**, *Inchcape Digital Delivery Center*

06/2021 – 07/2025

Pasig, Metro Manila, Philippines (Remote)

- Developed scalable applications using Symfony, optimizing internal workflows for product teams.
- Collaborated in SCRUM teams, improving delivery timelines and boosting website performance.
- Implemented RESTful APIs with GraphQL and Libsonnet and maintained robust testing pipelines using Postman and Behat.
- Conducted code reviews and provided mentorship to junior developers, fostering knowledge sharing and adherence to best practices in coding standards.
- Managed DevOps-based deployments and cutover plans to deliver web application updates smoothly into Kubernetes production environments.

**Full Stack Web Developer**, *FirstCom Solutions PTE Ltd.*

12/2020 – 06/2021 | Remote

- Engineered custom CMS platforms tailored to client needs, increasing usability and engagement.
- Maintained client websites built on WordPress and implemented feature updates and bug fixes.
- Partnered with project managers to refine project scopes and improve delivery efficiency.

**System Programmer**, *AFreight Philippines Inc.*

08/2019 – 12/2020

Tanauan, Province Of Batangas,  
Philippines

- Built secure web applications for internal and external use with a focus on performance.
- Delivered custom CMS tools that streamlined business operations and data workflows.
- Managed version control systems to track code changes effectively, ensuring accurate documentation of development processes and facilitating team collaboration.
